Information regarding the different tools used at SBForge

SBForge consists of a number of heavily integrated tools centered around a core of [Atlassian products](#). The idea is to provide a complete collaborative development platform for Open Source software projects, based on best-of-breed tools. For further information regarding the advantages of using SBForge, see [Benefits of using the SBForge platform](#).

For the status of the SBForge tooling platform in general see [TOOL-8 Establish production SBForge and Statsbiblioteket site](#)

- **Confluence** — This wiki which is used for SBForge hosted documentation. The wiki is based on Atlassians <http://www.atlassian.com/> Confluence Enterprise Wiki <http://www.atlassian.com/software/confluence/>.
- **Crowd** — The SBForge Single-Sign-On application based on Atlassian Crowd <http://www.atlassian.com/software/crowd/>, which manages the users and group used in the Tools applications.
- **Crucible** — Crucible <http://www.atlassian.com/software/crucible/> is an online review tool integrated with Fisheye. The SBForge Crucible can be found here <https://sbforge.org/fisheye>.
- **Eclipse** — Describes how to setup the Eclipse IDE http://en.wikipedia.org/wiki/Integrated_development_environment for developing SBForge projects.
- **Fisheye** — Fisheye <http://www.atlassian.com/software/fisheye/> is a SCM repository browser. The SBForge Fisheye can be found here <https://sbforge.org/fisheye>.
- **Forums** — We currently use the Confluence forum functionality provided through the Community Bubbles plugin <https://www.adaptavist.com/display/Bubbles/Home>
- **IntelliJ IDEA** — Describes how to setup IntelliJ IDEA <http://www.jetbrains.com/idea/> IDE http://en.wikipedia.org/wiki/Integrated_development_environment for developing SBForge projects.
- **Jenkins** — Jenkins <http://jenkins-ci.org/> Continuous Integration http://en.wikipedia.org/wiki/Continuous_Integration server (previously known as Hudson). You can find it here <https://sbforge.org/jenkins/>.
- **JIRA** — The SBForge issuetracker <http://sbforge.org/jira>
- **Maven** — Maven <http://maven.apache.org> is a state-of-the-art Java build system replacing Ant.
- **Nexus** — Maven repository manager
- **Sonar** — Sonar <http://www.sonarsource.org/> is an open platform to manage code quality.
- **Subversion** — Subversion <http://subversion.apache.org/> is an open source version control system used in SBForge
- **Team calendars** — Provides calendar functionality for Confluence/JIRA integrating JIRA, personal, iCal, Google etc. calendars.
- **Test**
- **Webdav server** — The web server used to expose project downloads and custom websites (f.ex. Maven site)
