

TEST11A

Test of upgrade, bitpreservation performance and security manager for batch jobs and allow third-party batch jobs to be submitted.

Setup

1. Install default netarchivesuite testsystem
2. Upload a mixed arc/warc bitarchive as per the instructions at [TEST12#UploadSmallBitarchive](#)

Tests

- [Bitpreservation - Restore missing files](#) — This test verifies that files lost in a replica can be restored correctly.
- [Legal Batch job test](#) — Uses a command-line tool several times and check that the output from the tool is correct as well as that the appropriate bit archives have been queried. Note that the number of files mentioned in the output is not necessarily exact.
- [Batch GUI test](#) — Verifies the Batch GUI functionality

Shutdown the \${TESTX} system when finished.
