

JWAT v1.0.3 (2015-06-02)

Released 2015-06-02.

Highlights

- Enhancements and bug fix in Common package
- Enhancements in ARC/WARC packages

Full list of issues resolved in this release.

Highlights

Enhancements and bug fix in Common package

- Moved some useful classes from the JWAT-Tools repository to the JWAT repository.
- Fixed serious exception in PayloadManager.

Enhancements in ARC/WARC packages

- Added helper classes to writer (W)ARC file(s) and automatically handle max bytes limit on individual files.
- Added easier support for ANVL data in WARCINFO record.
- ARC writer did not have extra logic to deduce payload length in some cases when validating a write records length.

Full list of issues resolved in this release.

T	Key	P	Summary
	JWAT-79		Add ANVLRecord to match existing alternative implementation
	JWAT-78		PayloadManager in JWAT-Tools seems to have a bug related to the closing of the RandomAccessFile and a non null tmpfile object.
	JWAT-77		Add (W)ArcFileWriter helper classes to manage open/next/close and rename from .open to final filename.
	JWAT-76		Setting only archiveLengthStr/contentLengthStr and not archiveLength/contentLength when writing ArcRecord/WarcRecord fails when comparing how much was actually written
	JWAT-74		Move common classes from JWAT-Tools to JWAT
