

JWAT-Tools v0.6.1 (2015-12-20)

Changes:

- Thomas LEDOUX: ContainerMDUtils class - function encodeContent() replaced by new function which is faster (about 10 times) and takes care of all the protected characters (even the control ones).
- Added extract code for WARC and GZip. Unit tests to follow soon.
- Added version to manifest.
- Show version in manifest instead of a constant string.
- Removed some JVM options in the start scripts.
- JWAT-74: Move common classes from JWAT-Tools to JWAT.
