

JWAT-Tools v0.3 (2012-03-09)

Changes:

- Changed to use the new unified error/warning classes in jwat.
- Started on compression task but changes required to arc/warc packages before compression is possible.
- Added gzip validation errors/warnings, cleanup of output.
- Implemented a wildcard filefilter and forgot to add it, including unittest.
- Switched tool to new gzip reader.
- Changed output of test command.
- Cleanup of decompress.
- Partial compress, but the arc/warc header is not captured so can not complete yet.
