

Upcoming features

Identified issues in the pipeline and unscheduled enhancements

Maintenance release.

Full list of issues planned for release 1.0.1.

T	Key	P	Status	Resolution	Summary
	JWAT-71		CLOSED	Fixed	Found IndexOutOfBoundsException while unit testing DataFormatException in GzipWriter
	JWAT-69		CLOSED	Fixed	Unit test WARC-Refers-To-Target-URI and WARC-Refers-To-Date.
	JWAT-72		CLOSED	Fixed	Scheme class is not case insensitive
	JWAT-70		CLOSED	Fixed	Unit test DataFormatException in Gzip reader/writer
	JWAT-67		CLOSED	Fixed	Validate support for sha256 Digest algorithm in WARC-header
	JWAT-66		CLOSED	Fixed	ArcRecords with invalid Urls do not get their HttpHeader parsed
	JWAT-65		CLOSED	Fixed	HttpHeader digest not calculated when using getInputStream on payload
	JWAT-50		CLOSED	Fixed	GZip: Better support for FEXTRA subfields.

8 issues

Unscheduled issues.

T	Key	P	Summary
	JWAT-86		GET requests not parsed correctly in wayback (??)
	JWAT-84		JWAT-Tools: Invalid CDX records
	JWAT-85		JWAT-Tools: Decompression doesn't restore files
	JWAT-36		WARC: The payload is inaccessible when the "Content-Length" is absent or invalid
	JWAT-94		Support ISO 28500:2017 in JWAT
	JWAT-93		Implement ANVL parser method
	JWAT-83		JWAT-Tools: Allow choice of output directory for compress task
	JWAT-80		Fails to read headers following additional CR
	JWAT-75		Look into reader optimization based on Kristinns observations
	JWAT-68		Implement unified ARC/WARC archive reader
	JWAT-63		HttpHeader.readHeader has problems with very large http headers
	JWAT-62		Add warnings in WARCWriter or remove comments
	JWAT-53		Unit test all streams using write(b, off, len) with off > 0
	JWAT-54		Test HeaderLineReader with LF.
