Process

Description of the development processes in Bitmagasinet

**Change management**

Describes the procedures for accepting and tracking changes to different part of the platform.

**Iteration plan**

Description of the strategy for using Iterations to separate the tasks we are going to work on, into small manageable chunks.

**System release procedure**

Describes the activities which should be performed to make a release of a full system.

**Task management**

Here you can find a description of how we manage the work we are doing in the project
