

Webdav server

The web server used to expose project downloads and custom websites (f.ex. Maven site)
The following sites are available:

- Download site at [http://sbforge.org/downloads/\\$PROJECT-NAME](http://sbforge.org/downloads/$PROJECT-NAME):
- Maven/Javadoc site at site at [http://sbforge.org/maven/\\$PROJECT-NAME](http://sbforge.org/maven/$PROJECT-NAME):

Uploads

Uploads can be done through [WebDAV](#) by using a suitable WebDAV client. Examples of WebDAV client are:

- Mac: Finder can be used to access webdav sites through the 'Go -> Connect To Server' menu.
- Linux:
 - Ubuntu: Use Nautilus, Select *Places -> Connect To Server*, and connect to <davs://<user>@sbforge.org/maven/netarchivesuite/apidocs>
- Windows: In File Explorer, right-click Computer and select Add a network location.

Permissions

Defaults are:

- Everybody can read the contents of the websites.
- Project members have can write to the site using the normal SBForge credentials.
