

# Ingester ~ (Thomas)

There are two ingesters, one that handles the "Radio TV" pre-ingest files and one that injects existing file-metadata with *ffprobe* metadata.

## FFProbe modification

The ffprobe tool has been modified to allow for xml output, below you will find an explanation of how to patch the original source-files to allow for XML output.

1. download ffmpeg trunk tree:

```
git clone git://source.ffmpeg.org/ffmpeg.git ffmpeg
```

2. Patch using this file:

```
http://cache.gmane.org/gmane/comp/video/ffmpeg/devel/136199-001.bin
```

2.a Description of patch found here:

```
http://thread.gmane.org/gmane.comp.video.ffmpeg.devel/135857/focus=136199
```

3. We use this .xsd file

[ffprobe.xsd](#)
