

Appendix 2D - metadata per publication and edition

Appendix 2D – metadata per publication and edition

The full schema consists of both options and requirements. Any comments must appear in Appendix 2 Specification of Requirements under the referring option or requirement. An option is only mandatory if the State and University Library chooses it.

If options (marked OptionA or OptionB) are not part of the agreement, the field will be left empty since the metadata schema is maintained at an external organisation and is therefore not under our own control.
