Issue management

Documentation on the issue handling process.

The documentation is based on the JIRA issue model we use in this project.

- Issue lifecycle — Here you can find a description of how we manage the issue status in the project
- Iteration planning — Description of the steps used to populate iterations.
- Road map planning — Documents the process for maintaining the NetarchiveSuite roadmap.
- Planning in JIRA — Here you can find tips and tricks on how to plan future releases and iterations in JIRA.
