

Home

DOMS is an open source **Digital Object Management System** based on [Fedora Commons](#) developed, and still under development at the [State and University Library in Denmark](#).

The deprecated old documentation for the project can be found at <http://wiki.statsbiblioteket.dk/domswiki>. This page contains information primarily concerned with the installation at the [State and University Library in Denmark](#).

- [Documentation](#) — This is the home of the technical descriptions of the modules making up the DOMS
- [HOWTOs](#)
- [Production Status](#)
- [Mediestream installation documentation](#) — This page contains information about the Mediestream portal installation
- [How to install DOMS-GUI for development on your machine](#) — How to install the DOMS GUI
