

Continuous Integration

[Continuous Integration](#) (CI) provides a mechanism for exposing the state of development projects in real-time.

The following CI services are available

Applications

- [Jenkins](#) — [Jenkins Continuous Integration](#) server (previously known as Hudson). You can find it [here](#).

Functionality

SBForges CI services can be used for monitoring:

- Compile status
- Unittest status
- [Systemtest/Acceptancetest](#) status
- Performance status
- Publish code analysis result
- Perform mvn deploy & site
- Perform server deploys
- [Release](#)
- [Regression test](#) on multiple branches, version, environments.
